

CARBON REDUCTION INSTITUTE

Carbon Reduction Certificate

The Carbon Reduction Institute would like to congratulate
for offsetting tonnes of
greenhouse gas emissions.

Carbon Neutral

The following emission sources have been calculated and offset using the online calculators developed by the Carbon Reduction Institute:

- 6 x Sydney - Coolangatta Return: 2.63 Tonnes.
- 1 x Large 4wd or V8 sports car @ 385 km/week: 7.15 Tonnes.
- 1 x Large 4wd or V8 sports car @ 192 km/week: 3.58 Tonnes.
- 2 x Medium car or small 4wd (4 cyl) @ 192 km/week: 4.5 Tonnes.
- Gas Usage Offset: 200 MJ Per Day (1 Year(s)) - 5.2 Tonnes.
- Power Usage Offset: 40 Kwh Per Day (1 Year(s)) - 15.6 Tonnes.
- Rubbish Offset: 3 X Medium (150 Litres)bins per Year (1 Year(s)) - 0.1 Tonnes.

To offset these greenhouse gas emissions, the Carbon Reduction Institute sources Greenhouse Friendly certified offsets from waste diversion projects. These projects reduce emissions by reducing the amount of methane produced from landfill.

The Carbon Reduction Institute would like to thank you for choosing to offset your emissions and we look forward to working with you again for a more sustainable future.

Kind Regards,

Rob Cawthorne
